STANDARDIZED NURSING DOCUMENTATION WITH PERIOPERATIVE NURSING DATA SET

Improve your OR workflow by enhancing your EHR with the most efficient, standardized documentation templates available.

Efficiency

Nursing documentation burnout is a leading cause of job dissatisfaction. Why? Because nurses are frequently being asked to document more than is essential, and they're working across documentation templates that don't contain standard data sets.

Standardized essential documentation from AORN Syntegrity can enable your team to:

- Benchmark data
- Identify best practices
- Reduce documentation burden

Saving time in this way can help nurses get back to doing what they do best: caring for patients.

Convenience

Hyperlinks to AORN eGuidelines+ can be included for fast, on-the-go clinical practice support.

AORN | eGUIDELINES+

At the click of a button, your nurses can access evidence-based recommendations including photos, illustrations, videos, and ambulatory supplements. Easily review positioning, prep, medication, tools, setup and more guidelines without having to impede workflow.

Safety

AORN is proud to be leading the charge to help specialty surgical centers maintain focused, accurate and streamlined procedures and documentation. Specialty content areas include:

- Endoscopy
- Ophthalmology
- Orthopedics

Plus, we are continuously adding new areas of practice.

If patient safety is your top priority, AORN Syntegrity can help.

Choose AORN Syntegrity documentation to reduce documentation burden, ensure patient safety and reduce costs.
