Contact Hour Calculation for Enduring/Web-based Materials

Enduring materials are designed for completion by learners, independently, at the learner's own pace and at a time of the learner's choice. The applicant designs the educational program, and, through a pilot study or other defensible mechanism, determines the number of contact hours to be awarded. The applicant must demonstrate the rationale for determining the number of contact hours to be awarded. Examples of methods to determine contact hours include pilot testing or word count formulas, such as the Mergener formula, a popular and widely accepted method of estimating the number of hours a written (or online) continuing education project will take to complete. A Mergener Formula calculator, provided by Stephen Z. Fadem, M.D., FACP, FASN, can be found online at http://touchcalc.com/calculators/mergener

Mergener Formula

Constants included in the Mergener Formula Sample:

<table>
<thead>
<tr>
<th>Number of words:</th>
<th>3774</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of questions</td>
<td>16</td>
</tr>
<tr>
<td>Difficulty of material</td>
<td>2.5</td>
</tr>
</tbody>
</table>

Determining difficulty of material--depends on target audience:
Very easy = 1; somewhat easy = 2; Moderate = 3; Difficult = 4; Very difficult = 5

Mergener Formula using above sample: 0.9 \times [22.3+(0.00209 \times \text{number of words}) + (2.78 \times \text{number of questions}) + (15.5 \times \text{difficulty of material})]

Subtotal of Sample = 68.81766 \times 0.9

Total minutes: 61.93589 = 1 contact hour (always round down when determining actual contact hour)
Pilot-Testing

In order to identify potential problems and provide evidence of the effectiveness of a program, a pilot-test is conducted with a group of representative learners from the target audience before finalizing the education activity for distribution and use. A pilot test also documents the time required for the learner to achieve the objectives.

The number of RN pilot-testers varies depending on the purpose and design of the activity as well as the size of the target audience. The entire learning package should be completed by the pilot-testers as if they were completing it for continuing education credit, including post test (self assessments), return demonstrations or other requirements, and evaluations. Feedback from the pilot-testers enables the planning committee to improve the activity prior to making it available for CE credit. Conducted prior to implementation of the activity, the pilot-test provides evidence of the:

a. Effectiveness of the design and the teaching/learning materials
b. Time required to complete the activity.
c. Basis for determining the number of contact hours to be awarded for successful completion of the activity.

The contact hours must reflect the documented time required by the pilot-test group to achieve the stated objectives. This may be an average of all time required or an average time of the majority of pilot-testers after discarding very short or very long time frames.

Upon completion of the pilot-test, the planners and content specialist(s) should carefully review the feedback/findings of the group to note if changes should be adopted before the activity is finalized or completed. In the application, you will be asked to describe what changes were made based on this evaluation. You may also want to provide supportive documentation of the rationale used to determine the number of contact hours to be awarded is submitted with application

Supportive Documentation and Disclosures

1. Include a copy of your finished article (study guide, module) or a link to your web-based program for review. 
2. ANCC requires that the learners must receive all of the following required disclosures before starting the learning activity, on the first page or slide of the activity.
   a. Program Title
b. Purpose/Goal Statement (include your target audience and it should be written exactly as you submitted through our online application)

c. Objectives (exactly as you submitted through our online application)

d. Requirements for successful completion

e. Whether or not sponsorship or commercial support was provided

f. The AORN statements:

**Before approval:**

"This activity has been submitted to the Association of periOperative Registered Nurses, Inc. for approval to award contact hours. The Association of periOperative Registered Nurses, Inc. is accredited as an approver of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

"Activities that are approved by AORN are recognized as continuing education for registered nurses. This recognition does not imply that AORN or the ANCC Commission on Accreditation approves or endorses any product in the presentation."

**After approval:**

This continuing nursing education activity was approved by the Association of periOperative Registered Nurses, Inc., an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation.

AORN recognized this activity as continuing education for registered nurses. This recognition did not imply that AORN or the ANCC Commission on Accreditation approved or endorsed any product included in the presentation.

**Expiration Notice:**

“The contact hours for this activity will expire two years after the date of approval."

3. Once the activity has been approved by AORN and you have your expiration date to place on the document, please email us your final copy of the Independent Study with the expiration date on it. Please send to ksimkins@aorn.org.

4. Advertising may not be included in the body of the article/study pages, and you must identify any conflict of interest. All materials listed above must be provided for approval of application.
