Perioperative Documentation, meet Standardization.

SAY HELLO TO THE NEW EVIDENCE-BASED PERIOPERATIVE DOCUMENTATION SOLUTION

AORN Syntegrity® will help standardize the way your procedures are scheduled, your perioperative data is managed, and your patients are treated. Designed to make today’s complex perioperative environment more efficient, cost-effective, and simply more manageable.

The only evidence-based standardized perioperative documentation built by perioperative clinicians.

What does the AORN Syntegrity include?

The Standardized Procedure List

The AORN Syntegrity® Procedure List is a library of surgical procedures that covers more than 2,300 procedures, all of which are referenced to CPT®-4, ICD-10-PCS and SNOMED-CT® codes. The use of the procedure list helps ensure more accurate searches for scheduling procedures, standardized communication, and preauthorization assistance that can save your organization time and improve your reimbursement process.

The Perioperative Nursing Data Set (PNDS) and Standardized Nursing Documentation

The PNDS is the only nursing language that provides standardized terminology to support perioperative nursing practice. It includes positive outcome statements that reflect patient responses to perioperative nursing care. This, along with our standardized nursing documentation represents the evidence-based practice that perioperative nurses provide and highlights the nurses’ contribution to patient outcomes.

How AORN Syntegrity will help you, your facility, and your patients

IMPROVE YOUR WORKFLOW
Streamline procedure searches to ensure the correct procedure is scheduled, increase preference card accuracy, and improve your overall reimbursement process.

ENHANCE PATIENT SAFETY
Improve standardization and documentation for each phase of perioperative patient care and confirm the right procedure is scheduled for the right patient.

LOWER YOUR COSTS
Add to your bottom line by allowing the documentation experts to do the work for you. The evidence-based changes and regulatory standards are reviewed and updated every year.

MEASURE YOUR NURSES’ VALUE
Easily provide policy makers, legislators, and insurers the crucial nursing data required to understand how your nurses contribute to cost-effective quality care.

MEET REGULATORY STANDARDS
Access nursing documentation and care plans to quickly and consistently deliver accurate data to the Joint Commission and other accreditation agencies.

PROVIDE RELIABLE DATA CAPTURE
Properly document each step of standardized perioperative care so your data can be compared, evaluated, and used to enhance patient care and operational efficiency.

Easily integrates with multiple EHR Systems
Protect your staff from legal liabilities and prove their value with proper standardized documentation.
Improve your facility’s bottom-line and OR efficiencies

Rely on the Perioperative Experts
Are you still relying on
• In-house or “home-grown” solutions
• Non-perioperative consulting organizations that don’t know your day-to-day perioperative challenges.

AORN Syntegrity is designed by perioperative clinicians and back by AORN’s Guidelines for Perioperative Practice and the latest version of the Perioperative Nursing Data Set (PNDS).
