

Technology Training Pathway: OR/Support Staff

Training Passport

Overview

Learning any new medical technology requires both guided and self-directed learning on the part of the physician and team. The following document outlines recommended activities for the OR/support staff who seek to develop the knowledge and skills necessary to support Intuitive technology. Please keep in mind that the recommendations provided here are only the beginning of the learning process. Self-directed study and practice are still required to master the technology. As with the use of any tool in the hospital, Intuitive technology should only be used after appropriate hospital requirements are met and when the physician and support team mastery of the technology is sufficient to use the technology safely.

NAME:

CELL PHONE:

HOSPITAL NAME:

OFFICE PHONE:

PHASE I - Introduction to da Vinci Technology

- Review video relevant to your planned procedures
- Complete a case observation with an epicenter or mentor physician

PHASE II - Da Vinci Technology

- Complete technology online training (recommended) www.learning.intuitive.com
- Complete technology in-service
- Complete technology online assessment www.learning.intuitive.com

PHASE III - Initial Case Series Plan

- Complete initial case series:
 - Plan case logistics (include physician and proctor during proctored case series)
 - Request staff to record case time metrics
 - Collect post-case feedback from physician (include proctor during proctored case series)

PHASE IV - Continuing Development

- Attend OR/support staff training course(s)
- Complete at least two additional activities after initial case series (recommended):
 - Complex procedure observation
 - Complex procedure video review
 - Webinar

Commitment

Agreement

I understand and agree to the Intuitive Technology Training Pathway process as outlined above.

Disclosures

Training provided by Intuitive is limited to the use of Intuitive technology, instruments and accessories. It does not replace the necessary medical training and experience required to perform procedures. Before performing any procedure using Intuitive technology, physicians are responsible for receiving sufficient training to ensure that they have the skill and experience necessary to protect the health and safety of their patients. Intuitive technology should only be used by physicians and staff who have received specific training in the use of Intuitive technology. Prior to using any training materials, refer to Intuitive Learning to ensure you are using the most up-to-date revision and that the software version of the training matches the software version installed on your system. There may be instances in which certain training content or activities listed above may not be available. For example, activities that require case history (e.g. videos or observations) may not be immediately available following a new product launch. In those cases, if you wish for additional training, please consult with your hospital and/or work with your Intuitive representative to explore alternative training activities.

For important safety information, indications for use, risks and full cautions and warnings, please refer to the user manual(s) and www.intuitive.com.
